# MD TRAINING PROGRAMME

## Introduction

The period of training shall be a minimum of 24 months after passing the Part 1 examination. The principal aim in using this Log book is to document the training exposures, experiences and skills a resident acquired during the training period for objective assessment with greater emphasis paid to Research and Medical Education.

1. Every resident applying for the award of the College MD must submit duly completed Log book, Certificate of Training and other documents as specified by the College and Faculty.
2. Residents should read carefully his/her institution's training guidelines for the award of the postgraduate MD before completing this Log book.
3. This Log book is sold to Associate Fellows of the College in the Faculty of Public Health and Community Medicine only.
4. After the resident has passed the Part I Examination in Public Health and Community Medicine, he should obtain a copy of this Log book from the Faculty Secretary, the College Registrar or his head of department or accredited training institution, if they had earlier bought them for the convenience of their residents. Residents are to complete the Log book in real time.
5. The supervising consultants must certify all the requisite attendances and procedures documented in the Log book. Where such consultant is not on the official teaching staff list of the accredited training department, for example, Consultant in cognate specialties or external posting, the supervising Community Physician in the training department must countersign such signature.
6. Residents who spend less than the recommended minimum training exposure period (as detailed in the curriculum) in any of the sub-specialty area will not qualify. For this reason, residents should take special care to ensure accuracy and honesty when completing the Log book and Certificate of Training, since these, along with other relevant documents, will be scrutinized during vetting of candidates for examination.

7. Supervising consultants who are Fellows of Public/Community Health (NPMCN or WACP) should evaluate and endorse all documented exposures/experiences as soon as practicable after the exposure or experience to ensure accuracy and reliability of such evaluations. However, where a Fellow of another specialty or any other person supervised the exposure, the endorsement of the primary supervisor must be counter-signed by a Fellow of Public Health in the training institution.
8. The training must take place in an institution that is accredited for the training by the College. The trainee shall work under the direct supervision of at least one recognized medical consultant who must also be a Fellow of the Faculty of Public Health of the College.
9. Thesis title should be in the subspecialty the Candidate has chosen.
10. Residents and their trainers are reminded that the Part II examination in the Faculty of Public Health and Community Medicine in the National Postgraduate Medical College of Nigerian is the national and highest certification in the specialty.

## **ASSESSMENTS**

### **1. FORMATIVE ASSESSMENT**

- a. The Log book is used to assess the candidate during the period
- b. Assessments are in areas of Lecture attendance, Postings, Seminars, Tutorial sessions

### **2. SUMMATIVE ASSESSMENT**

- a. MD by Thesis only
  - i. Oral defense during NPMCN examination
- b. MD by Course and Thesis
  - i. Oral Thesis defense

## **COURSES**

The Candidate must go for the update courses in the Faculty as approved by the College after passing Part I Examination not earlier than January of the year preceding that which he/she intends to appear for MD Summative assessment in Thesis. Courses in any other sub-disciplines are encouraged. The details of the courses and other activities as required must be documented in this Log book. This Log book and other documents pertaining to other courses attended by the resident must be submitted for vetting prior to qualification for the assessment.

# SENIOR RESIDENCY TRAINING PROGRAMME

## Introduction

The period of training shall be a minimum of 36 months, after passing the Part 1 examination. The principal aim of this Log book is to document the training exposures, experiences and skills a resident acquired during the training period for objective assessment. While it is important to pass the examination, greater emphasis should be paid to the training process itself. Senior Residents should take note of the following:

7. Every resident applying to sit the Part II examination must submit duly completed Log book, Certificate of Training and other documents as specified by the College and Faculty.
8. Residents should read carefully his/her institution's training guidelines and the FMCPH curriculum before completing this Log book.
9. This Log book is sold to Associate Fellows of the College in the Faculty of Public Health and Community Medicine only.
10. After the resident has passed the Part I Examination in Public Health and Community Medicine, he should obtain a copy of this Log book from the Faculty Secretary, the College Registrar or his head of department or accredited training institution, if they had earlier bought them for the convenience of their residents. Residents are to complete the Log book in real time. Trainers and residents should note that inspection of the Log book would subsequently form part of accreditation/re-accreditation/ad hoc college visitation exercises to evaluate the implementation of residency training in accredited training institution.
11. The supervising consultants must certify all the requisite attendances and procedures documented in the Log book. Where such consultant is not on the official teaching staff list of the accredited training department, for example, Consultant in cognate specialties or external posting, the supervising Community Physician in the training department must countersign such signature.
12. Residents who spend less than the recommended minimum training exposure period (as detailed in the curriculum) in any of the sub-specialty area will not be admitted to the examination. For this reason, residents should take special care to ensure accuracy and honesty when completing the Log book and Certificate of Training, since these, along with other relevant documents, will be scrutinized during vetting of candidates for examination.

11. Supervising consultants who are Fellows of Public/Community Health (NPMCN or WACP) should evaluate and endorse all documented exposures/experiences as soon as practicable after the exposure or experience to ensure accuracy and reliability of such evaluations. However, where a Fellow of another specialty or any other person supervised the exposure, the endorsement of the primary supervisor must be counter-signed by a Fellow of Public Health in the training institution.
12. The training shall be for a minimum period of 36 months for resident generalists as well as those specializing in any of the subspecialties who have passed the Part I examination of the National Postgraduate Medical College of Nigeria in Public Health and Community Medicine. For those specializing in any of the subspecialties they will spend their last 12 months in their area of specialization. The training must take place in an institution that is accredited for the training by the College. The trainee shall work under the direct supervision of at least one recognized medical consultant who must also be a Fellow of the Faculty of Public Health of the College.

Finally, residents and their trainers are reminded that the Part II examination is the national certification examination in the specialty. Consequently, evidence of increasing participation and contributions to professional organizations and activities (attendances at conferences, workshops, lecturing and other tutoring and preceptorships, delegated representations, operational research, etc.) locally, nationally and internationally including evidence of publications will be assessed.

## **Part II Examination**

Part II residents must have passed the Part I Examination of the Faculty of Public Health and Community Medicine three years before the date of the proposed examination to be eligible. In addition, they must have been or admitted for this stage of training in an accredited training institution and worked on an approved research dissertation under the supervision of a Fellow of Public/Community Health and others as appropriate during this period. The examination will consist of two oral examinations: namely, an oral defense of the dissertation and an examination on the Principles and Practice of Public Health and Community Medicine.

The duration of time to be spent on each sub-discipline of Public Health and Community Medicine during this senior residency phase of 3 years should be determined between the resident and his training institution, depending on the areas of emphasis desired by the resident. However, for a generalist, non-separately certified sub-specialty FMCPH, a minimum of 4 weeks further practical exposure must be undertaken in each of the 10 principal subspecialty areas of Public Health and Community Medicine listed below.

Residents who are able to obtain a certified academic education in any of the sub-specialties or teaching areas of community medicine during this senior residency are strongly advised to do so e.g., in the areas of Biostatistics, Health Education, Medical Sociology, Medical Ethics, Public Health Nutrition, Mental Health, Environmental Health, Occupational Health, Managerial or Industrial Psychology, and Health Management.

## **RECORD OF TIME OF TRAINING IN EACH SUBSPECIALTY FOR THE PART II FMCPH EXAMINATION**

The duration for Part II shall be for 36months. For the purpose of training for the Part II FMCPH Examination, the following sub-specialties of Public Health and Community Medicine are recognized for possible further emphasis or sub-specialization:

Course Code	Subspecialty	Duration	Credit Unit
PUB 934	Epidemiology and Disease Control	12weeks	24
PUB 935	Reproductive and Child Health	6weeks	5
PUB 936	Environmental Health	6weeks	6
PUB 937	Health Policy, Planning and Management	6weeks	4
PUB 938	Occupational Health	4weeks	6
PUB 939	Public Health Nutrition	2weeks	4
PUB 940	Health Promotion and Education	2weeks	4
PUB 941	International and Port Health	2weeks	4
PUB 942	Biostatistics	4weeks	6
PUB 943	Social and Rehabilitative Medicine	4weeks	4
	<b>TOTAL</b>	<b>48weeks</b>	<b>67</b>

### **SUBSPECIALTIES: Duration 48weeks**

This shall be taken in any subspecialties of Public Health as well as any other areas i.e. a multi-disciplinary Public Health and Community Medicine practice areas in which certified or uncertified training is being encouraged such as the followings:

**Demography**  
**Medical Sociology**  
**Managerial, Personnel or Industrial Psychology**  
**Medical Ethics**  
**Ergonomics**  
**Industrial Hygiene**  
**Social Work**

**Medical Informatics**  
**Mental Health**

**FIELD ACTIVITIES**

The following field activities should be integrated into the training programme.

i)	Dental Public Health	2weeks
ii)	Mental Health	2weeks
ii)	Computers in Public Health	4weeks
iii)	Public Health Laboratory for Exposure to Microbiology, Parasitology, Haematology	2weeks
iv)	Treatment of Common Endemic Diseases including Malaria and the Sexually Transmitted Diseases (STDs)	2weeks
v)	Management of Essential Drugs	2weeks
vi)	Tuberculosis and Leprosy Control	2weeks
vii)	Medical Officer of Health Posting	2weeks
viii)	Rural Health Posting	8weeks
ix)	International Health, Port Health Services	2weeks
xi)	Posting for Experience in Industrial and Occupational Health	4weeks
xii)	Posting for Experience in Paediatrics, Obstetrics & Gynaecology e.g., in A&E Units settings	12weeks
xiii)	Social and Rehabilitative Medicine	4weeks
	<b>TOTAL</b>	<b>48weeks</b>

**SENIOR RESIDENCY TRAINING DURATION**

1. SUBSPECIALTY COURSES.....	12months
2. FIELD ACTIVITIES.....	12months
3. SUBSPECIALTY/GENERALIST POSTINGS.....	12months
<b>TOTAL</b>	<b>36months</b>

## **COURSES**

A Senior Resident must attend at least the two review/update courses after passing Part I approved by the College and Faculty in Research Methodology and Health Services Management; and Medical Ethics not earlier than January of the year preceding that which he/she intends to sit the Part II examination. Courses in any other sub-disciplines are encouraged. The details of the courses and others activities as required must be documented in this Log book. This Log book and other documents pertaining to other courses attended by the resident must be submitted for vetting prior to qualification for the examination

# SUB-SPECIALTY POSTINGS

## PUB 934 EPIDEMIOLOGY AND DISEASE CONTROL

**DURATION:** 12weeks

**CREDIT UNITS:** 24

The Resident is introduced to the practical application of Epidemiological Methods in

- a. The design and execution of field epidemiologic studies; and
- b. The investigation of disease outbreak in a community.

The training should be done by rotational postings to the Epidemiological Units at Federal, State and Local government levels or the departmental Epidemiological unit if the department has active field service and/or consulting services. It is important that the Resident documents the specific areas of exposure/experience in the table below and provides a short description or summary of his involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the logbook.

Skills/Competencies	Dates: From – To	Type/Disease/Place e.g. Cholera, Epidemic, Ebola, Koko (place)	Grade	Supervising Consultant's Signature
1. Outbreak investigation				
2. Epidemiologic studies				
3. Population Health Assessment				
4. Control of locally endemic diseases eg. Malaria control				

5. Review/Analysis of hospital data for local decision making				
6. Short Courses or other Training Exposures in Epidemiology				

**GENERAL ASSESSMENT**

	A	B	C	D	E
Punctuality					
Report with patients					
History taking skill					
Ability to work without supervision					
Initiative					
Ability to work with other colleagues					
Application of professional					
Expertise and knowledge					
Attitude to work					
Attitude to patients					
Sense of responsibility					

**Explanatory Notes**

Rating should be as follows:

A = Very good                      B = Good                      C = Average  
D = Poor                                E = Very Poor

# PUB 938 OCCUPATIONAL HEALTH

**DURATION:** 4 weeks

**CREDIT UNITS:** 6

The Resident is introduced to the practical application of aspects of Occupational Health/Medicine. The Resident is expected to have competencies in

- a. Personal and Environmental Monitoring in Occupational Health
- b. Health promotion in the work place, as well as, the investigation and control of work place hazards

The training should be done by rotational postings to the Occupational Health Unit of the Federal Ministry of Health or other equivalent institutions and in selected industries, e.g., NNPC, SPDC, Exxon-Mobil, etc. It is important that the Resident documents the specific areas of exposure/experience in the table below and provides a short description or summary of his involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the logbook.

Skills/Competencies	Dates:	Type of Exposure /	Grade	Supervising
	<b>From – To</b>	<b>Occupational Disease: e.g. Use of Noise or Air samplers, etc, Pre-employment screening</b>		<b>Consultant’s Signature</b>
1. Personal and				
Environmental Monitoring in the work place				
2. Investigation of				
occupational diseases and accidents				
3. Work place medical				
examinations				

4. Pre-employment screening				
5. Review/Analysis of industrial health data for local decision making				
6. Short Courses or other training exposures in Occupational Health				

### GENERAL ASSESSMENT

	A	B	C	D	E
Punctuality					
Report with patients					
History taking skill					
Ability to work without supervision					
Initiative					
Ability to work with other colleagues					
Application of professional					
Expertise and knowledge					
Attitude to work					
Attitude to patients					
Sense of responsibility					

## PUB 935 REPRODUCTIVE AND FAMILY HEALTH

**DURATION: 6 weeks**

**CREDIT UNITS: 5**

The Resident is expected to acquire skills and competencies in Sexual and Reproductive Health service delivery including provision of services to important subgroups of the population especially adolescents. The Resident is expected to have skills/competencies in

- a. Delivery of personal services, for example, provision of family planning services
- b. Health promotion for in- and out-of-school adolescents.

The training should be done by rotational postings to the Family Planning Clinics, Sexually Transmitted Infections (STI) clinics, Ante-natal and Maternity Clinics, etc. It is important that the Resident documents the specific areas of exposure/experience in the table below and provides a short description or summary of his involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the Log book.

<b>Skills/Competencies</b>	<b>Dates: From – To</b>	<b>Type of Exposure Disease: e.g. Family Planning, School Health, etc.</b>	<b>Grade</b>	<b>Supervising Consultant's Signature</b>
1. Delivery of Family Planning services				
2. Management of labour using partograph				
3. Counselling on PMTCT				
Counselling on adolescent sexual and reproductive issues				
Counselling on adolescent sexual and reproductive issues				
4. Conducting outreaches for in-school and out-of-school youths				

5. Provision of promotive, preventive childcare services including management of sick children at the first level health facilities using the IMCI case management guidelines.				
6. School health Service: Including examination of school environment and screening of school children				
7. Short Courses or other Training Sexual and Reproductive Health				

### GENERAL ASSESSMENT

	A	B	C	D	E
Punctuality					
Report with patients					
History taking skill					
Ability to work without supervision					
Initiative					
Ability to work with other colleagues

Attitude to work					

#### **Explanatory Notes**

Rating should be as follows:

A = Very good  
D = Poor

B = Good  
E = Very Poor

C = Average

# PUB 937 PUBLIC HEALTH POLICY, PLANNING AND MANAGEMENT

**DURATION: 6weeks**

**CREDIT UNITS: 4**

The Resident is expected to acquire skills in Health Policy, Planning and Management through participation in policy and programme plan development, Programme implementation and budgeting. This may be acquired during rotations through the Federal and State Ministries of Health, Management of first level facilities, etc.

Residents are encouraged to document the specific areas of exposure/experience in the table below and provide a short description or summary of their involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the logbook.

Skills/Competencies	Dates: From – To	Type of Exposure/Experience		Acquired	Consultant's Signature
		Grade	Supervising		
1. Policies and Programme Plan Development					
2. Programme Plan Implementation					
3. Budgeting					
4. Monitoring and Evaluation					
5. Function of the Medical Officer of Health					

## PUB 940 HEALTH PROMOTION AND EDUCATION

**DURATION:** 2weeks

**CREDIT UNIT:** 4

The Resident is expected to acquire skills to coordinate community mobilization and carry out advocacy visits to potential donors, key persons or development partners. As in other areas, Residents are encouraged to document the specific areas of exposure/experience in the table below and provide a short description or summary of their involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the logbook.

Skills/Competencies	Dates: From – To	Type of Exposure/Experience Acquired Grade Supervising		Consultant's Signature
1. Development of Health Education Materials, eg. Handouts/posters, health education booklets				
2. Social Mobilisation				

3. Public Lectures/Seminars (Topics, objectives, target audience, etc.

# PUB 942 BIOSTATISTICS

**DURATION:** 4weeks

**CREDIT UNIT:** 6

The Resident is expected to acquire skills in the use of Word Processing, Spreadsheet and Statistical Packages for Data Analysis. Residents should document the specific areas of exposure/experience in the table below and provide a short description or summary of their involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the Log book.

Skills/Competencies	Dates: From – To	Type of Exposure/Experience Acquired	Grade	Supervising Consultant's Signature
1. Pro · ciency in use of computer applications – Word Processing, Spreadsheet and Statistical – EPI-Info, SPSS, STATA				
2. Advanced skill in qualitative data analysis				
3. Development of Health Management Information System				
4. Courses Training Seminars in Biostatistics				

# PUB 936 ENVIRONMENTAL HEALTH

**DURATION:** 6weeks

**CREDIT UNIT:** 6

The Resident is expected to be conversant with the policies, legislations and procedures regulating the inspection or audits of a wide range of premises including residential, educational and commercial. While the Residents are not legally covered to carry out these inspections or audits on their own, they should nevertheless have exposures while accompanying relevant officials during visits. In this regard, some component of the posting is expected to be carried out in relevant departments in federal, state or local governments. However, residents should on their own acquire relevant skills to carry out Health Impact Assessment either as stand-alone or as component of Environmental, Social and Health Impact Assessment. Residents should document the specific areas of exposure/experience in the table below and provide a short description or summary of their involvement or participation in the spaces provided for the purpose after the Consultant's General Assessment page. If needed, additional sheets may be used and affixed to the Log book.

<b>Skills/Competencies</b>	<b>Dates: From – To</b>	<b>Type of Exposure/Experience Acquired</b>	<b>Grade</b>	<b>Supervising Consultant's Signature</b>
1. Inspection/Audits of premises including Residential, Educational, Commercial, for example, Food premises, Hotels, etc.				
2. Visits to Public Sanitary Works Departments - Municipal Water Works, Abattoirs, etc. including proficiency to carry out water quality assessment				

3. Health Impact Assessment				
4. Domestic, Commercial and Industrial Waste Management				
5. Courses/Training Seminars in Environmental Health
